EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicant's representative, Mr. Anthony P. Curtis (Reg. NO. 46,193) on July 28, 2005.

The application has been amended as follows:

Please amend claim 17 to read as follows"

17. (Currently amended) ~~A manual input device comprising a knob:~~

~~a feeling providing device which has at least two kinds of feeling patterns:~~
and

~~an actuator which positions at least one of a ball or a pin in contact with the feeling providing device;~~ The manual input device according to claim 1, having

a detector which detects an operating condition of the knob; and

an input/output section which exchanges signals with an external device controlled by the knob,

wherein both a detection signal at least from the detector and an external signal from an external detector connected with the external device are inputted into the external device to generate a control signal for the actuator to match the detection signal and the external signal, and wherein the actuator is controlled according to the control signal.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

With respect to independent claim 1, none of the cited reference either singularly or in combination teach or fairly suggest, a manual input device that includes among other features, a feeling providing device comprises one of a disc or a cylinder which bears plural feeling patterns, and is fixed to a control shaft to be manipulated by a knob, the at least one of the ball or the pin contacts the one of the disc or the cylinder and changes an operation feeling given to the knob, wherein the actuator linearly reciprocates the at least one of the ball or the pin in a direction where the plural feeling patterns are arranged. Similar limitations are included in independent claims 6 and 7.

With respect to independent claim 15, none of the cited references either singularly or in combination teach or fairly suggest, a manual input device that includes among other features, an external signal from an external detector connected at least with external device, and is inputted into the control section through the input/output section to generate a control signal for the actuator to match at least the external signal, and wherein the actuator is controlled according to the control signal. Similar limitations are included I independent claim 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
